SUMMARY

I build websites, GoHighLevel funnels, and AI automations that help businesses capture leads and follow up with them automatically. In GoHighLevel I set up funnels, landing pages, pipelines, calendars, payments, and email and SMS workflows. I use Claude in my work to build faster and to set up AI replies and workflows. Before this, I spent over 3 years in customer support for US companies, including Credit One Bank and Uber, so I'm used to clear communication, deadlines, and keeping clients updated.
